box

modular & ecologic

Box es un baño independiente y modular. Consta de segmentos donde se incluyen los diferentes sanitarios para conformar una estancia.

Es energéticamente responsable y contribuye al ahorro de agua. Incluye una bomba térmica, que utiliza el aire húmedo para calentar el agua y calefactar la estancia.

Box is a project about an independent and modular bathroom. It consists on segments where the different sanitary pieces are included to configure a bathroom.

It is energetically responsible and contributes to the water saving. It includes a thermal bomb, which uses the humid air to warm the water and the stay.

the bathroom.

Se han creado varios módulos que encajan entre sí.

Además incluye un último módulo de cerramiento que puede ir abierto, o con cristal, que a su vez puede ir completamente cerrado o con puerta de acceso.

There have been created several modules that fit between them to form different possibilities depending on the needs of each customer.

In addition it includes a last closing module that can be opened, or with crystal closing, which can be completely closed or with an access door.

01box

Incluye el inodoro y el lavabo, y aloja la bomba de calor y los dos depósitos de agua. Este módulo incluye todos los elementos principales, ya que debe de poder funcionar de manera independiente como un simple aseo.

It includes the watercloset and the wash-basin, and lodges the thermal bomb and both water tanks. This module includes all the principal elements, being able to work in an independent way as a simple bathroom.

02box

Contiene la ducha, un pequeño asiento de apoyo y dos estantes.

It contains the shower, a small seat and two shelves with towel racks.

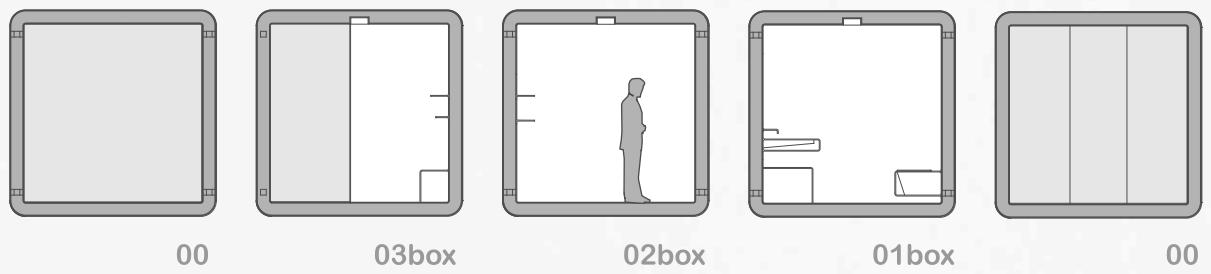

03box

Para hacer la estancia de mayor tamaño se ha creado un módulo con dos estantes de apoyo adicionales, pero sin ningún elemento sanitario.

For doing the bathroom bigger a module has been created with two additional shelves, without any sanitary element.

the modules.

Los módulos están formados por una estructura metálica hueca para alojar los depósitos y las instalaciones sanitarias y eléctricas.

Las tuberías y cableados son de materiales flexibles para adaptarse a la ubicación de los módulos, ya que pueden estar ubicados en cualquier posición.

The modules are formed by a metallic hollow structure to lodge the water tanks and the sanitary and electrical facilities.

The pipelines are made in flexible materials to adapt to the location of the modules, which can be located in any position.

1 water intake.

The Box only needs a water and an electricity intake to supply everything necessary to this bathroom.

2 thermal bomb.

It includes a thermal bomb, which uses the humid air to warm the water and the stay.

3 hot water tank.

The water proceeding from the thermal bomb is stored in the hot water tank.

4 used water tank.

When the water is consumed by the shower and the wash-basin it is stored in the used water tank.

5 watercloset cistern.

The cistern is supplied by the used water tank, and we don't use clean and drinkable water for the watercloset.

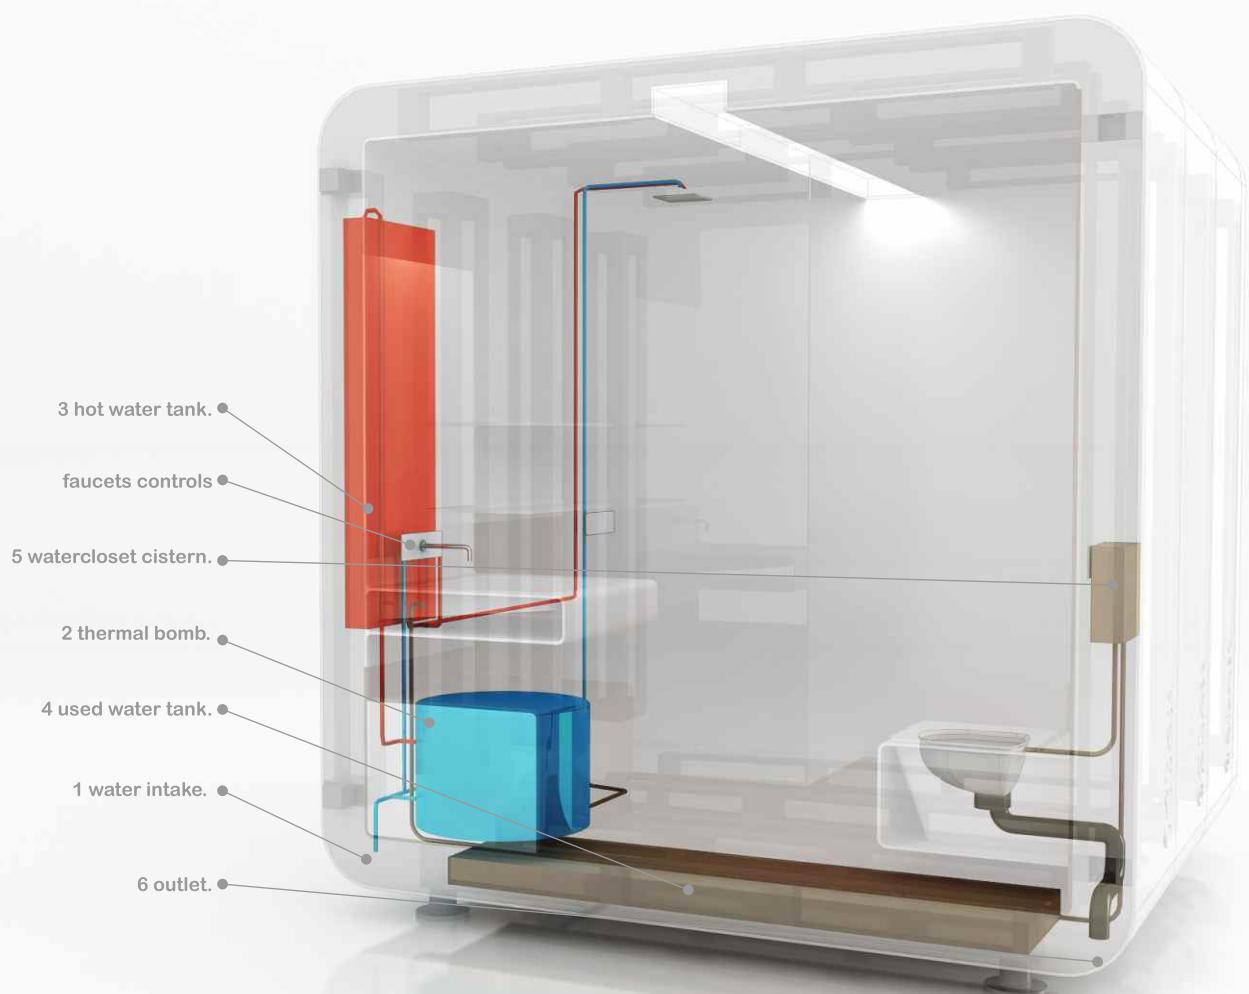

6 outlet.

Finally the water is rejected by the watercloset outlet.

faucets controls

All the controls of the faucets are electronic and tactile to control the water, it inform you at all time about the temperature to which is the water and the quantity that is consumed. When the faucet turns off it inform you about the water that has been exhausted since it was turned on.

water economy.

Los módulos están formados por una estructura metálica hueca recubierta de Corian® y madera.

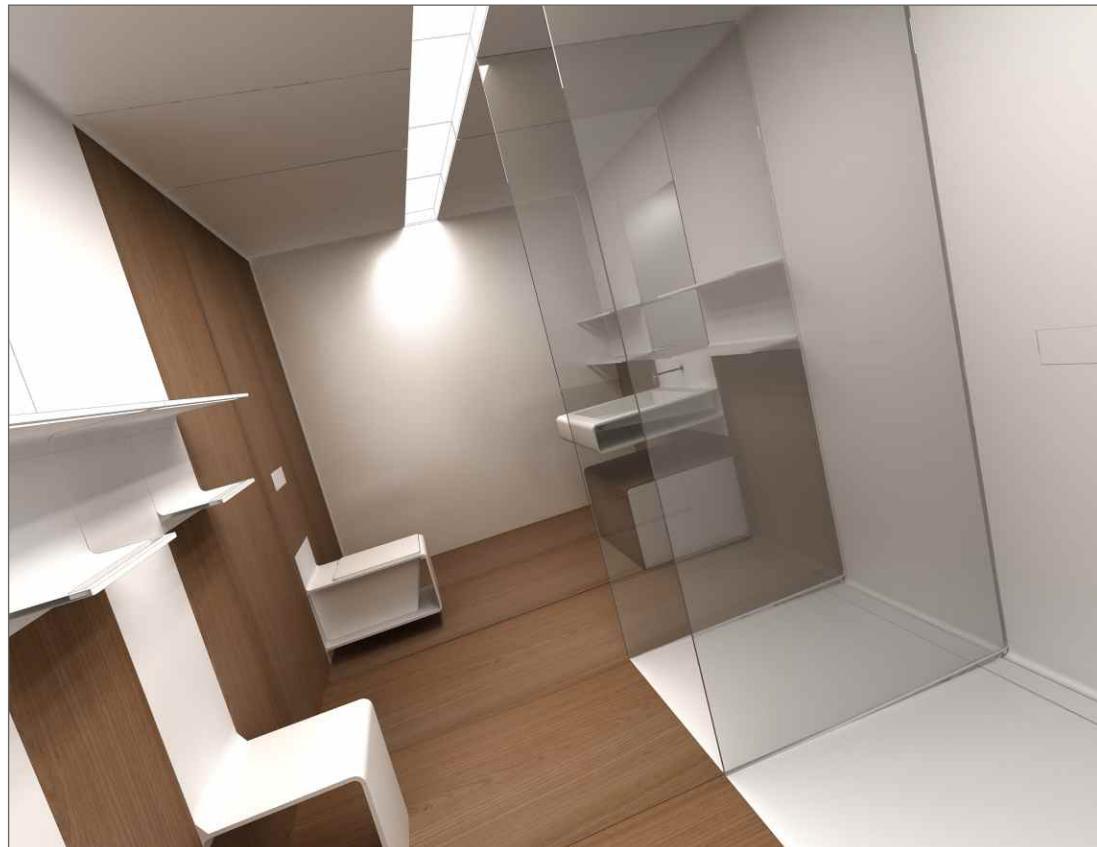

Este baño es perfecto para cualquier tipo de vivienda, hotel o loft ya que su montaje in situ resulta rápido y sencillo.

No necesita de ninguna partición o habitación existente. También puede usarse como pequeño vestuario o cuarto de baño para exteriores o jardines.

The modules are formed by a metallic hollow structure covered with Corian® and wood.

This bathroom is perfect for any type of housing, hotel or loft. Its in situ assembly it's fast and simple.

It doesn't need any partition or existing room to be installed. Also it can be used as a small wardrobe or bathroom for exteriors or gardens.

the space.

YONOH es un estudio de desarrollo creativo multidisciplinar. Clara del Portillo (Valencia 1980) y Alex Selma (Faura 1980), diseñadores industriales, fundan YONOH en el año 2006, tras haber desarrollado sus carreras por separado. Uniendo sus inquietudes creativas crean modelos que se diferencian por su sencillez y funcionalidad y plantean piezas que derrochan frescura y singularidad; piezas funcionales y de una belleza estética que desprenden sencillez y desenfado, sin abandonar la innovación y la originalidad.

Alex y Clara se conocen al inicio de sus carreras en la exposición NUDE 2004, a partir de entonces, comienza una colaboración que les lleva a crear Yonoh en 2006. Desde entonces YONOH va tomando forma como estudio, estando presentes en las ediciones 2005/06/07 del NUDE, en Design Lab Paris 2005, Casadecor Valencia 07 y exponiendo en Spain Emotion en Tokyo en 2008. Es en este mismo año cuando se le otorga al estudio el premio nacional Creación Injuve, otorgado por el Ministerio de Igualdad, que cada año elige a lo más destacado del panorama joven de diseño español.

YONOH is a multidisciplinary development creative studio. Clara del Portillo (Valencia 1980) and Alex Selma (Faura 1980), both industrial designers by training, found YONOH in the year 2006, after having developed their careers separately. Joining their creative worries they create models who differ for their simplicity and functionality and design pieces that detach freshness and singularity; functional pieces and of a beauty aesthetic that offer simplicity and naturalness, without leaving the innovation and the originality.

Alex and Clara met at the beginning of their careers in the exhibition NUDE 2004 in Valencia, Spain. At that time they begin a partnership that leads them to create Yonoh in 2006. Since then YONOH is evolving as a studio exposing in the next NUDE editions from 2005 till 2007 in Design Lab 2005 in Paris, France and in Spain Emotion, an exposition organized by the Spanish ICEX in Tokyo, Japan in 2008. Also in 2008 they were awarded with the Injuve prize, given by the Spanish Ministry of Equality, as one of the best new Spanish design studios of the year.
